

NEOLITH

828 L. PC SAFE.

NEOLITH 828 PC SAFE is a gentle, all round liquid graffiti remover designed mainly for hard non-porous surfaces such as metal, glass, tiles, polished marble and granite and painted surfaces. Safe to use on polycarbonate surfaces

NEOLITH 828 PC SAFE will remove aerosol paint, felt tip marker and a variety of paint and ink.

NEOLITH 828 PC SAFE is effective on most types of surfaces, including brick and masonry. Always check a small area for compatibility.

ADVANTAGES.

- . Low odour for operator comfort and safety.
- . Low rate of evaporation leading to low product loss.
- . Non-chlorinated, giving a safe, environmentally responsible product.
- . High flash point for safety.
- . Easy to use liquid form.
- . Highly effective.
- . Does not contain MNP.

INSTRUCTIONS.

Damp a clean cloth with NEOLITH 828 PC SAFE, dab and wipe off the graffiti, turning the cloth so that a clean side is used each time. Rinse with water to neutralise the surface. Repeat the process if necessary. NEOLITH 828 PC SAFE can also be spray applied.

PACK SIZE.

5 LITRES.

This is just one product from the NEOLITH graffiti removal range.
