

SAFETY TRAINING FOR FLOWPLANT DESILTERS

Flowplant Desilter training courses are for operators who use our high pressure equipment to desilt cable ducts.

Our trainers are certified by the Water Jetting Association and they work in accordance with the latest industry

codes. Theory and practical sessions are combined into a two day course covering all safety aspects of the desilting operation.

...our trainers have practical desilting experience and 1000's of successful trainees have gained certification...
