FLOWPLANT®

Engineering excellence in high-pressure
pump systems

FOCUS ON DRAIN JETTING

Flowplant has been creating innovative, high pressure drain and sewer cleaning equipment for over 50 years, selling thousands of high quality and reliable machines throughout the UK and exporting to over 50 countries around the world.

YOUR JETTING NEEDS

Through our nationwide network of service and distribution centres, we offer a complete range of keenly priced drain jetters and accessories that get the job done, are affordable within your budget and will continue to operate efficiently and cost effectively for many years.

- ✓ HIGH PRESSURE / HIGH QUALITY / HIGH PERFORMANCE
- ✓ DOMESTIC / COMMERCIAL / INDUSTRIAL APPLICATIONS
- ✓ LIGHTWEIGHT / COMPACT / REMOTE CONTROLLED
- ✓ VAN PACKS / TRAILER MOUNTED / TRUCK MOUNTED
- ✓ BESPOKE / INNOVATIVE / DURABLE / COMPETITIVE
- ✓ FINANCE PACKAGES AVAILABLE

YOUR PROFESSIONAL JETTER PARTNER

Get in touch today on

or call 01722 325424
today.

Supplying durable, versatile products is just the start of our long-term customer relationships. Our experienced teams are always available to give free technical advice, demonstrations, commissioning and instruction on purchase, plus exceptional after-sales support that includes safety and operator training, 24 hour spares and nationwide servicing. As a quality assured company, all Flowplant equipment is:

- ✓ **MANUFACTURED TO THE ISO9001:2008 QUALITY ASSURANCE STANDARD**
- ✓ **FULLY COMPLIANT WITH INDUSTRY REGULATIONS: BS EN 1829 PARTS 1 AND 2**
- ✓ **CE MARKED TO ENSURE COMPLIANCE WITH THE EUROPEAN MACHINERY DIRECTIVE**

We also have:

- ✓ **VCA TYPE APPROVAL FOR OUR TRAILER MOUNTED EQUIPMENT**
- ✓ **MEMBERSHIP AND ACCREDITATION OF THE WATER JETTING ASSOCIATION**

WHICH PRODUCT IS RIGHT FOR YOU?

Our van mounted jetters are designed to be extremely lightweight, with a compact foot print and build quality second to none. We also offer a complete professional installation of the van pack into your chosen vehicle, carried out by our highly trained engineers.

TRAILER MOUNTED JETTERS

We offer a wide and varied range of reliable and versatile trailer jetters with options including: jetting performance parameters; water carrying capacity; 2 or 4 wheel models.

TRUCK MOUNTED JETTERS

We manufacture a large range of innovative and high quality truck mounted drain cleaning machines, including high pressure jetter vehicles. These range from 3.5 ton box type vans to large purpose built sewer and drain cleaning vehicles.

Turn the page to find out more about our range of trailer jetters...

GTH 3008

The smallest trailer unit in the Flowplant range. Operating at 3000psi and 8 gpm, this powerful petrol engine driven unit will clean drains up to 150mm diameter. The hose reel is manually wound. It is rear mounted and can hold 90m of 3/8" jetting hose. Jetting power comes from a triplex pump and Honda twin cylinder petrol engine giving an output of 3000 psi at 8 gpm. The engine is air cooled and has an electric start.

FINANCE
FROM £79.80
PER WEEK

DTK 3010

Perfect for jetting in domestic or light commercial drainage systems. It works at 3000 psi and 10 gpm so can tackle most drain jetting jobs. Includes a large 500 litre water tank.

Rear mounted controls make it easy for operators to monitor all the machine functions while safely cleaning the drain or sewer.

FINANCE
FROM £120.99
PER WEEK

DTK 500

Delivers 4,000 psi at 12 gpm using the Harben P pump. Perfect for contractors who need to get the job done first time!

Its legendary Harben P pump can drive the hose deep into sewers blocked with silt, fat, scale or roots, restoring flow in a matter of minutes. It has more than enough jetting power to clean 300mm drains quickly and professionally.

FINANCE
FROM £154.45
PER WEEK

DTB 500

For cleaning up to 300mm drains outside of Europe and the EU. Same specification as the DTK500 but uses a Stage 3 diesel engine. Includes hydraulic powered hose reel. Its legendary Harben P pump can drive the hose deep into sewers blocked with silt, fat, scale or roots, restoring flow in a matter of minutes.

DTX II

A larger unit, with a Harben P-type pump giving a performance of 4000psi and 12 gpm. The 900 litre capacity water tanks give more jetting time, ideal for areas with a restricted on-site water supply.

Its legendary Harben P pump can drive the hose deep into sewers blocked with silt, fat, scale or roots, restoring flow in a matter of minutes. It has more than enough jetting power to clean 300mm drains quickly and professionally.

FINANCE
FROM £221.38
PER WEEK

We also produce water jetting equipment for working pressures up to 3000 bar. Built in accordance with our own ISO9001 quality standards, we can comply with relevant industry standards including ATEX, Norsok, DNV2.7-1.

Give us a call and we would be delighted to tell you more about our standard range or discuss a bespoke water jetting application.

CUSTOMISED SERVICE

With many members of staff having tens of years of experience in drain jetting systems and equipment, Flowplant has earned an enviable reputation for our pre and post sales customer service. This includes rapid nationwide support for demonstrations, servicing, maintenance and repairs, with spares available within 24 hours.

Our role is to be the jetting systems partner for your business, providing a personal service that suits your needs, whatever the size of your operation. Our local support network for both sales and high quality after-sales service comes with a 'can-do' attitude designed to help keep your business growing.

Technical Advice, with the constant introduction of new accessories and processes in the water jetting industry, application knowledge can be invaluable to you. Our technical team offers up to date information and advice on all types of high pressure jetting equipment and their application. Technical Hotline: 01722 325424.

ON-GOING SUPPORT

At Flowplant, we understand that investing in our products is just the beginning. Our dedication extends far beyond the sale, encompassing a comprehensive range of post-purchase services designed to support you at every step.

ON-SITE DEMONSTRATIONS - There is a wide range of drain and sewer cleaning machines to choose from and selecting the model most suitable for your needs can be a difficult task. Why not contact us and arrange for a member of our team to come and discuss your drain jetting and sewer cleaning requirements and carry out a no obligation on-site demonstration.

COMMISSIONING - Following the purchase of your drain cleaning equipment, it is important that it is correctly set up and safe to use by you and your operators. Recognising this is an important part of the purchasing process, on-site commissioning of equipment is another value added service that we are happy to provide free of charge.

PROBLEM SOLVING - Put us to the test and call our technical hotline with your drain clearing query. Whether this is to just clean or jet a pipeline or the jetting of surfaces or equipment, you can rest assured we will have encountered your water jetting machine question in the past and be able to offer expert technical advice.

TRAINING

Unlock your full potential as a water jetter through our practical and comprehensive training courses. At Flowplant, we believe in combining theoretical knowledge with hands-on experience to ensure you gain a complete understanding of the jetting operation.

Investing in operator training yields remarkable benefits. Trained operators exhibit heightened proficiency, enhanced productivity, reduced accident risks, and fewer mistakes. By valuing and nurturing your workforce through training, they become more committed to the success of your business.

Flowplant are proud to be an authorised company for delivering **Water Jetting Association** training courses accredited by **City & Guilds**, providing you with peace of mind and recognised industry validation.

With a rich history spanning over fifty years, Flowplant has become a trusted leader in training individuals worldwide on the safe operation of high-pressure water

jetting equipment. As one of the largest providers of specialised water jetting training, **our expertise is unmatched in the industry**. Our examiners bring over 15 years of practical experience with various types of water jets, ensuring real-world insights and valuable instruction.

As a full member of the Water Jetting Association (WJA), Flowplant actively contributes to the development of cutting-edge training modules. We're proud to hold memberships with esteemed organisations like The **British Safety Council** and maintain **ISO BS EN 9001:2015** accreditation. Moreover, our status as a Rolls-Royce vendor-approved entity further solidifies our commitment to quality and excellence.

MODULES

If you're seeking comprehensive water jetting training courses aligned with WJA standards, look no further. Contact us today to learn more about our range of industry-accredited programs.

Scan the QR to complete our training enquiry form online.

One of our training team will be in touch to answer all of your questions.

01 SAFETY AWARENESS (COURSE)*

A fundamental course that sets the groundwork for safe and responsible jetting practices.
(*Successful completion of this course is a prerequisite for additional modules)

02 PRESSURE WASHING (COURSE)

Powerful combination of theory and practical, covering the safe setup, operation, and maintenance of pressure washer systems.

03 DRAIN & SEWER (MODULE)

Acquire the skills needed to tackle drain and sewer cleaning challenges with confidence.

04 TUBE & PIPE CLEANING (MODULE)

Learn the intricacies of tube and pipe cleaning techniques for optimal results.

05 SURFACE PREPARATION (MODULE)

Discover the art of surface preparation using high-pressure water jetting methods.

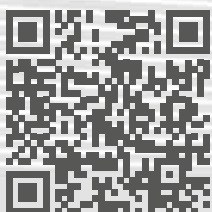

SERVICING & MAINTENANCE

Your peace of mind and the reliability of your water jetting systems, pumps, and equipment are at the heart of our commitment. With our depots located in Salisbury, Rotherham and Glasgow, plus dedicated mobile engineers, we are poised to provide expert support and guidance on all aspects of equipment maintenance.

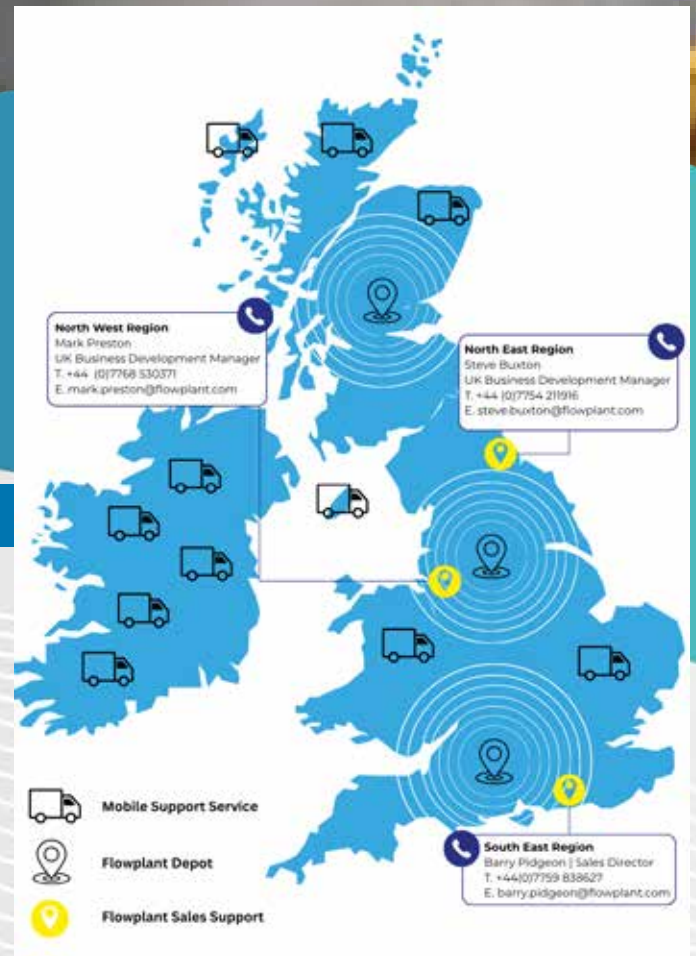

Our trained engineers are always on hand to offer expert advice on all aspects of maintaining your water jetting systems, pumps and equipment. A full range of spares is readily available within 24 hours.

Our Service Division can advise you or your engineering staff plus undertake servicing, repairs and remedial work in the field, from our fleet of mobile vans, or at our service centres.

We offer a range of servicing and maintenance packages to suit your requirements, ensuring your equipment is always operating reliably, efficiently and safely.

Scan the QR to view our sales, service & maintenance map in more detail.

Whatever you need to successfully run your jetting business, you can depend on Flowplant.
