

## Product Specification

# Drain Jetter Nozzle Kit

### To be used with the Flowplant range of Drain Jetting Machines

Having the correct Flowplant drain jetting accessories & tools is just as important as having the correct Flowplant drain jetting machine. This handy nozzle kit ensures you can arrive at the site ready and prepared to tackle the toughest of blockages within the drain & sewer.

Flowplant have produced a new **'Drain Jetter Nozzle Kit'** to ensure that you have the correct nozzles and tools available to hand for each and every site visit.

This comprehensive kit which is presented in a heavy duty carrying case and includes our most popular nozzles and tools.

These include :-

**'Standard Drain Jet Nozzles'** to tackle the toughest of blockages.

- 1 x nozzle with 3 rear facing jets
- 1 x nozzle with 3 rear facing and 1 forward facing jet
- 1 x nozzle with 6 rear facing jets

All nozzles are accurately sized to work at the optimum performance of the Flowplant drain jetter unit.

**'High Efficiency Drain Jet'** nozzle. Tests show that this drain jet has 30% more cleaning power than a standard drain jet and so provide excellent cleaning performance.

**'Nozzle Extension Bar'** to help prevent the drain jetting nozzle from turning inside the drain and potentially exiting the duct where a collapse.

**'Jet Cleaning Tool'** for engineers to ensure nozzle jets remain free from solid particles.

**'Bursting Discs'**

This specialist **'Drain Jetter Nozzle Kit'** (part number **0561253**) is ideal for engineers who might have shared access to a Flowplant drain jetter and ensures the correct accessories & tools are always available. Alternative nozzle choices are available – please ask for details.

This is just one of many products available from Flowplant to assist for drain cleaning companies with the quick and efficient cleaning and unblocking of underground sewers and pipes.
