

The logo for Flowplant, featuring the word "FLOWPLANT" in white, uppercase, sans-serif font, centered within a dark blue, horizontally-oriented oval shape. The oval is flanked by two thin, white, curved lines that sweep upwards and outwards from the top and bottom edges.

FLOWPLANT®

Bespoke High Pressure Fluid Engineering

The background of the brochure cover is a photograph of an offshore oil and gas platform. The platform is a complex structure of yellow metal scaffolding, walkways, and pipes, situated in the middle of a blue sea under a clear blue sky. Several tall, white, cylindrical structures, likely chimneys or ventilation stacks, are visible on the platform. The image is partially obscured by a large, semi-transparent blue and green graphic element on the right side, which has a curved, wave-like shape. The bottom of the cover features a white and grey gradient background with a horizontal line.

OIL & GAS BROCHURE

Flowplant is a supplier of fluid pumping systems, hydrostatic test units and high pressure umbilical flushing equipment. We specialise in supplying the offshore and onshore energy sector, chemical plants, oil refineries and utilities.

EXPERTISE WHICH FLOWS

Flowplant has been manufacturing high pressure pump equipment in the UK for over 50 years, and in that time have built a reputation for technical excellence, high quality and reliability.

Flowplant is a supplier of fluid pumping systems, hydrostatic test units and high pressure umbilical flushing equipment. We specialise in supplying the offshore and onshore energy sector, chemical plants, oil refineries and utilities.

A long established SME with assembly plants in the UK and USA supporting a worldwide network of distributors. The special projects division **designs and builds bespoke equipment** to customer specifications.

Our customers comprise some of the world's most prestigious and successful companies. We export to all the major regions of the world.

To ensure Flowplant has the ability to offer it's clients such class-leading expertise, it has invested not just in technology but also in it's people.

This expertise is the reason Flowplant successfully partners with the most prominent companies on a range of high profile projects.

PROJECT MANAGEMENT - Rely on our expert project management team to guide you through the entire process, ensuring successful and timely completion.

OPERATOR TRAINING - Benefit from our comprehensive operator training to ensure efficient and safe use of high-pressure jetting equipment.

DELIVERY ON TIME - Trust Flowplant's commitment to delivering your orders promptly and meeting your project deadlines.

COMPLIANCE ASSURED - Rest assured that our products and services comply with industry standards and regulations, guaranteeing top-notch quality and safety.

INDUSTRY EXPERTISE - Tap into our wealth of experience and knowledge in the high-pressure jetting and pumping industry.

BESPOKE DESIGN OPTIONS - Explore our customisable solutions, tailored to your specific needs and requirements.

PROJECTS TO BUDGET - We work diligently to keep your projects within budget, providing cost-effective solutions without compromising quality.

WORLD CLASS TECHNOLOGY

DESIGN EXCELLENCE - Our engineers and project managers are fully conversant with the latest EU directives governing the design of high pressure pumping systems. When more specialist equipment is required we can manufacture to meet ATEX, Norsok and IEC Ex regulations.

HYDROSTATIC TEST UNITS - Flowplant have a range of standard fast fill hydrostatic test units operating at up to 1,400 bar and we will also design bespoke units to customers requirements.

FLUSHING UNITS - The Harben® pump is being used in most major offshore energy regions providing a reliable and efficient method of flushing umbilical lines and hydraulic equipment to meet ISO4406 and SAE AS4059 cleanliness codes. The pump carries ATEX approval for use in Zone 1.

HPU'S - Low viscosity oils and subsea control fluids can be pumped at pressure by Harbens unique diaphragm pumps. Many of the flushing units we manufacture are dual purpose and can be used as HPU's.

WATER BLASTERS- Our range of Harben® and Aqua® water blasters offer simple and cost effective solutions to the everyday cleaning problems encountered in all industrial installations.

INNOVATION INTEGRITY EXCELLENCE

WE are an innovative and focused engineering company.
WE encourage open and honest partnerships in all our activities.
WE care deeply about what our customers think of our products.
WE work hard to ensure that the projects entrusted to us are delivered in a safe and environmentally aware manner which exceeds expectations.
