

# WJA Drain & Sewer Practical Module

The WJA Drain & Sewer Practical Module is a hands-on training session for operatives working with high-pressure water jetting equipment in drain and sewer systems. Delivered by experienced Flowplant instructors, the module combines classroom-based learning, group discussions, and a practical assessment.

## Who Should Attend?

This practical module is suitable for:

- **New jetting operatives**
- **Drainage contractors**
- Water jetting **service supervisors** and designers
- **Site owners** and **health & safety managers**
- **Permit issuers** and site-based compliance staff

All delegates must have passed the WJA Safety Awareness course within the past three years.

## Course Objectives

- **Structures and applications** for drain and sewer jetting
- The **WJA Code of Practice** and how it applies on-site
- Hose and nozzle selection, **maintenance**, and safety
- **Equipment checks** and managing reaction force
- **Injury prevention**, PPE / RPE requirements
- The difference between grit blasting and water jetting
- Effective team roles and responsibilities
- Leaving the site safe and secure

The session ends with a practical water jetting task assessment, reviewed by your WJA coach.

**Optional Add-On:** Drain, Sewer & Gun Module Upgrade to the Drain, Sewer & Gun Module, which includes an additional 30 minutes of focused training on the safe operation of a water jetting gun.
