

FLOWPLANT

- Suitable for drains up to 300mm
- Compact & Low weight
- Latest low emission diesel engine
- 7 Channel Radio remote control
- Engine start/stop, pressure & flow control

320 Series Van Pack

City & Guilds
Accredited
Programme

WATER JETTER TRAINING

Flowplant training courses are written by water jetting experts. They combine a written test and a hands-on session – every aspect of the jetting operation is covered.

ELEVATE YOUR SKILLS

Unlock your full potential as a water jetter through our practical and comprehensive training courses. At Flowplant, we believe in combining theoretical knowledge with hands-on experience to ensure you gain a complete understanding of the jetting operation.

Investing in operator training yields remarkable benefits. Trained operators exhibit heightened proficiency, enhanced productivity, reduced accident risks, and fewer mistakes. By valuing and nurturing your workforce through training, they become more committed to the success of your business.

Flowplant proudly offers a complete range of **Water Jetting Association** approved courses, accredited by **City & Guilds**, providing you with peace of mind and recognised industry validation.

With a rich history spanning over fifty years, Flowplant has become a trusted leader in training individuals worldwide on the safe operation of high-pressure water

jetting equipment. As one of the largest providers of specialised water jetting training, **our expertise is unmatched in the industry**. Our trainers bring over 15 years of practical experience with various types of water jets, ensuring real-world insights and valuable instruction.

As a full member of the Water Jetting Association (WJA), Flowplant actively contributes to the development of cutting-edge training modules. We're proud to hold memberships with esteemed organisations like The **British Safety Council** and maintain **ISO BS EN 9001:2015** accreditation. Moreover, our status as a Rolls-Royce vendor-approved entity further solidifies our commitment to quality and excellence.

MODULES

If you're seeking comprehensive water jetting training courses aligned with WJA standards, look no further. Contact us today to learn more about our range of industry-accredited programs.

Explore our training modules designed to sharpen your skills and expand your expertise.

Get in touch today on training@flowplant.com or call 01722 325424 (Option 3) today.

01 SAFETY AWARENESS (THEORY)*

A fundamental module that sets the groundwork for safe and responsible jetting practices. (*Successful completion of this module is a prerequisite for additional modules)

02 DRAIN & SEWER FOR DUCT DESILTING (PRACTICAL)

Master the techniques for efficient desilting operations in ducts and pipelines.

03 DRAIN & SEWER (PRACTICAL)

Acquire the skills needed to tackle drain and sewer cleaning challenges with confidence.

04 TUBE & PIPE CLEANING (PRACTICAL)

Learn the intricacies of tube and pipe cleaning techniques for optimal results.

05 SURFACE PREPARATION (PRACTICAL)

Discover the art of surface preparation using high-pressure water jetting methods.

06 HYDRO-DEMOLITION (PRACTICAL)

Dive into the world of hydro-demolition and gain expertise in controlled concrete removal.

“The quality & quantity of the course was excellent. Our trainer Mark Preston was a really knowledgeable guy about all aspects of the desilting machine. The theory on the course related to the practical and everything tied in seamlessly. Safety was the main focus on all aspects of the course. With the excellent instruction and detail on how to use the machine, we came away feeling we could use the equipment safely & competently. “
